

Work tables for the art sector with ergonomic design and versatile possibilities

Our flexible system, which can be extended upon at any time, is particularly suitable for universal use. Whether in a museum, studio, storage/archive area, galleries or flex space – the tables are versatile.

Mobile or stationary, with or without height adjustment, the tables can be connected to form a large work surface if required. An extensive range of accessories makes it easy to customise the tables to your needs.

ERGO-Basic worktable features

- ▶ Height adjustable up to 1180 mm
- ▶ Side lengths in a ratio of 1:2 for table combinations
- ▶ 4 swivel castors, 2 with brakes
- ▶ Robust, stable and powder-coated tubular steel table frame
- ▶ 350 kg max. load capacity with equally distributed load
- ▶ Smooth, easy-to-clean, abrasion- and scratch-resistant table top

Technical information

All work tables are characterised by their durability, robustness and ease of cleaning. The materials used are free from chemical emissions or vapours.

With a wide range of accessories, including drawers, additional shelves, roll-off and cutting devices for films or paper, as well as lighting, the tables are highly versatile.

The tables can be customised in order to adapt them optimally to the desired application.

Standard mass

Width x depth: 800 x 1600 mm or 1000 x 2000 mm
Height without castors: 720-1020 mm
Height with castors: 880-1180 mm

Other standard sizes available. Special sizes on request.

Load capacity

- max. 350 kg with equally distributed load

Table frame

- 40 x 40 mm steel profile, powder-coated in RAL 9006

Floor rollers

- 4 swivel castors Ø 125 mm, 2 with brakes

Height adjustment range

- 880-1180 mm
- Adjustable by clamping screw, hand crank or electric motor

Clamping screw

Hand crank

Electric motor

Worktop

- melamine resin coated
- abrasion and scratch resistant
- easy-to-clean surface
- anti-glare fine texture on both sides
- 30 mm thick with chipboard core and 2 mm ABS edges all round
- RAL 7035 light grey

Standard worktop for normal use.

Other table tops, e.g. chemical-resistant, on request.

Table connector

- Tensioning clamps made of galvanised steel

Due to the 1:2 aspect ratio, all tables can be connected to form a large work surface.

Height-adjustable table with a film unwinding and cutting device, operated by a hand crank – ideal for packaging exhibits.

Let us advise you – we will find the optimal solution for your needs!
